PFFA Work Groups are exclusive events for PFFA members and invited guests. These triannual conferences are brought to you by the PFFA, our planning committee members, our sponsors and the board of directors. These conferences provide an opportunity to discuss, debate, share, and take away ideas, best practices, and relationships from/with the most talented and experienced face-to-face fundraisers, managers, consultants, and supporting organizations in the U.S. and beyond.

The first PFFA Working Group was held in the first quarter of 2015, and those invested in sustainable practices have been meeting three times annually since. The 2026 Spring Work Group marks twelve years and thirty sixth meetings of the best and brightest face-to-face minds.

Thank you ❤️ for your support of the PFFA and our shared vision for ethical, sustainable, and effective face-to-face fundraising practices in the United States.

10:15-11:10 **The Voice at End of the Line: Turning Cancellation Calls into Donor Retention Strategy**

Ali Jones, Oxfam

Ever wondered what REALLY happens when a donor calls to cancel? Turns out—it's one of the most powerful moments in the entire fundraising journey.

In this session, Ali Jones, Associate Director, Oxfam's Sustainer Acquisition & Marketing Strategy, will dig into why these conversations matter far more than we think.

When a donor reaches out to cancel their monthly gift, it becomes one of the most valuable feedback moments in their entire journey. This session explores the critical role donor services teams play in reducing early attrition—and why they must be fully integrated into F2F strategy, onboarding, and supporter communications.

From Fragmented Efforts to Integrated Impact: Exceeding Sustainer Benchmarks Through System Design

Sherry Bell, Grow Fundraising & Consulting Inc. & Ken Petterson, ASDF

Many nonprofits apply strong sustainer practices- thoughtful acquisition, meaningful stewardship, adaptable donor care and reactivation efforts - but often in isolation. This fragmentation can limit results, even when each component is well executed.

This session presents two case studies in which organizations exceeded established first-year sustainer retention benchmarks after intentionally integrating best practice elements into a single, coherent system. Rather than introducing new tactics, the focus is on what happens when clarity of vision, operational readiness, and long-term relationship design come together.

Using the Sustainer Canopy framework, participants will explore how moving away from a loss-oriented view of retention toward an integrated systems mindset creates resilience, absorbs natural donor lifecycle change, and produces measurable gains. The session offers a practical lens for leaders
